

REMARKS

The Examiner is thanked for the thorough examination of this application and the indication that claims 3-5 and 9-11 contain allowable subject matter. Claims 1, 4, 7, and 10 are amended. Specifically, independent claims 1 and 7 have been amended to incorporate the allowable subject matter of claims 3 and 9. Claims 4 and 10 are also amended. Claims 3, 5, 9, and 11 have been canceled. Independent claims 1 and 7 are, therefore, in immediate condition for allowance, and dependent claims 2, 4-6, 8, and 10-12 are also in condition for allowance.

Claims 13 to 22 are newly added.

The newly added claims define characteristics that are not taught or disclosed in the prior art. Referring to FIG. 4 of the present application, the upper fixed seat 39, isolation layer 40, and conductive device 42 are flat, and thus triangle spaces are formed as shown in FIG. 5 to fix the lamps. In contrast, Fig. 4 and Fig. 6 of Moon do not show flat upper seats, and the upper supports 543a and 543b are designed with grooves each corresponding to a lamp. The flat design is easier to implement, reducing cost and complexity.

CONCLUSION

For at least the reasons described above, independent claims 1 and 7 are allowable over the cited references. Insofar as the independent claims define over the cited art, the remaining (dependent) claims patentably define over the cited art as well.

Should Examiner feel that further discussion of the application and the Amendment is conducive to prosecution and allowance thereof, please do not hesitate to contact the undersigned at the address and telephone listed below.

No fee is believed to be due in connection with this Amendment and Response to Office Action. If, however, any fee is believed to be due, you are hereby authorized to charge any such fee to deposit account No. 20-0778.

Respectfully submitted,

By:

Daniel R. McClure, Reg. No. 38,962
